

User story	#	Task	Responsible	Assignees	Estim. effort (h)	Actual effort (h)	Done (yes/no)	Notes
As a user, I want to run a script to connect to the cameras represented in the database over IP commands	4	Set up mock environment with images to simulate cameras	Jordy	Jordy, Shane	4	0	no	Jordy is now longer on the team. Also since we can now talk to actual cameras at polycast it is no longer as important.
	5	Set up a videostream to the camera to get live-feedback in the the front-end	Shane	Shane, Hidde	6	6	no	Setting up a videostream has proven to be difficult. After looking at multiple ways and libraries to make it work, we decided to see if we could open the stream in VLC player, but even that didn't work.
	6	Connect front-end to cameras API with visualizations	Shane	Shane, Jordy, Joris, Hidde, Floris	6	??(Hidde)	partially	We can now retrieve snapshots for a preset, but since the stream isn't working, that part is incomplete.
	7	Add option to use preset with or without iris and/or color settings	Shane	Shane	3	0	no	Stream had higher priority
As a camera controller, I want to clearly see what image a preset has	8	Loop through all presets and make a snapshot to link to represent the preset	Hidde	Joris, Hidde	3	0	no	The camera API was refactored, this took more time and had a higher priority
As a director, I want to see a preview of the next camerashot.	9	Display a preset thumbnail	Joris	Joris, Hidde	3	4	yes	
As a user, I want to select and edit a script to my liking	10	Finish the edit view, add the features that enables the user to insert and delete specific actions	Floris	Floris	4		no	Due to 2 very important midterms I haven't been able to finish it. I did do a part of this task but haven't been able to finish it
	11	Create a drag and drop feature for the presets to drag from the preset list to an action so a user can bind a preset to an action this way	Floris	Floris	4		no	Because of important midterms and the other task this wasn't finished. It also seems to be somewhat more of a challenge than anticipated
As a user, I want to create a script from scratch	12	Add a feature to the edit view that lets you start from scratch with a new script	Floris	Floris	2		no	Same reason as the above two

Review I5

Main problems encountered

- 1) Due to this week also being midterm-week, some of our project members didn't have much time.
- 2) Streaming seems to still be unsolved on how to get it to work.

Adjustments next week

- 1) Next week has no midterms.
- 2) Our first step is to get it an actual stream working by connecting to the stream with VLC player. Once that works, we can probably figure something out. We have also been told BeNine did get the stream to work, maybe we could ask them for advice.
