

User story	#	Task	Responsible	Assignees	Estim. effort (h)	Priority (A-E)	Reason for priority
As a user, I want to run a script to connect to the cameras represented in the database over IP commands	4	Set up mock environment with images to simulate cameras	Jordy	Jordy, Shane	4	C	Base for all functionality with cameras
	5	Set up a videostream to the camera to get live-feedback in the the front-end	Shane	Shane, Hidde	6	B	Live-feedback is needed to assure the team the camera is in position
	6	Connect front-end to cameras API with visualizations	Shane	Shane, Jordy, Joris, Hidde, Floris	6	B	Connecting the components
	7	Add option to use preset with or without iris and/or color settings	Shane	Shane	3	C	The polycast team said they use this functionality when recalling presets from the camera
As a camera controller, I want to clearly see what image a preset has	8	Loop through all presets and make a snapshot to link to represent the preset	Hidde	Joris, Hidde	3	C	Having a snapshot results in an immensely faster workflow
As a director, I want to see a preview of the next camerashot.	9	Display a preset thumbnail	Joris	Joris, Hidde	3	C	Having thumbnails makes the director view more clear
As a user, I want to select and edit a script to my liking	10	Finish the edit view, add the features that enables the user to insert and delete specific actions	Floris	Floris	4	A	To have a fully functioning edit view this needs to be implemented
	11	Create a drag and drop feature for the presets to drag from the preset list to an action so a user can bind a preset to an action this way	Floris	Floris	4	B	Nice to have something like this, but it also works with a drop down menu. This feature will make changing preset binds faster making the workflow even faster.
As a user, I want to create a script from scratch	12	Add a feature to the edit view that lets you start from scratch with a new script	Floris	Floris	2	A	Users must be able to make new scripts when a new show is coming therefore this feature is quite crucial for the system.
